Infection Prevention Measures at Sendai Airport
Sendai Airport is working with all relevant parties to prevent the spread of the new coronavirus by placing the highest priority on the health and safety of passengers and employees.

Disinfection of airport facilities
- Handrails in the terminal building (including escalators) and baggage cart handles and other areas that passengers come into direct contact with are disinfected on a regular basis.
- At the security checkpoint, trays, baskets, slippers and other items used during inspections are disinfected on a regular basis.

Ensuring social distancing
- When using the check-in counter security checkpoints and shops, please stand at appropriate intervals while waiting in line.
- Please give people sufficient space when using sofas and chairs.

Installation of plastic screens
- Plastic screens have been installed at check-in counters, security checkpoints, and cash registers.

Installation of hand sanitizer
- Hand sanitizer is available at various points around the airport, including at entrances and security checkpoints.

We ask for your cooperation by wearing a mask while in the airport.

Passengers who are unwell, such as those with a fever, may not be allowed to fly.
In addition, some airlines may require an examination of your physical condition, such as a temperature check, during check-in procedures.
Thank you for your understanding and cooperation.
